

SELL PREPAID VISA® CARDS THROUGH YOUR CHECK CASHING SOFTWARE

Introducing an instant issue Prepaid Visa card built right into your Secure Check Cashing System™ (SCCS).

The MultiCorp Prepaid Visa program will allow you to earn revenue by activating, loading and reloading Prepaid Visa cards directly through your check cashing software.

The MultiCorp Prepaid Visa is an included feature of your Secure Check Cashing solution. It is fast, easy, and a great way to attract and retain business. Customers simply cash their checks and instead of being paid in cash, their money is loaded onto an instant issue prepaid Visa card.

MULTICORP PREPAID PROGRAM ADVANTAGES

- **Fully integrated with Secure Check Cashing (SCCS)**
Create card sales and reloads in seconds using your regular check cashing system.
- **Increase Cash Available to Run Your Business**
When loading cards, instead of paying cash, use the one day of float created by putting currency on your customers cards. Keep your Cash!
- **Cashless Check Cashing**
Substantially decrease the amount of in-house cash needed to operate your check cashing business.
- **A New Source of Revenue**
Selling and reloading cards can generate significant revenue for your retail location.
- **No Cost and No Obligation**
All marketing materials provided free of cost - posters, brochures, and card packs.

INCOME POTENTIAL

- Selling an average of 4 cards per day = \$600 of additional instant monthly revenue
- Future potential commissions paid on all cards issued through your store.

SELL PREPAID VISA® CARDS THROUGH YOUR CHECK CASHING SOFTWARE

How do I get started?

The MultiCorp Prepaid Visa is an included feature of your SCCS check cashing software. For our current customers, the card feature is available with a free system update. To begin using the program and selling cards, simply complete the Merchant Service Agreement and return it to SCCS. Upon acceptance, you will be trained and issued your first shipment of MultiCorp Prepaid Visa Cards.

How does it work?

Each time a customer cashes a check at your store, the system will provide the option to load all or a portion of the funds due to the customer onto the MultiCorp Prepaid Visa. The system will create a new account for the customer and activate a new card containing the appropriate funds. Provide the new card to the customer and it is ready for use. Existing cardholders have their cards reloaded with a simple swipe of the card through your check cashing system card reader.

How much money will my store make?

The amount of money that a store will make selling and loading the MultiCorp Prepaid Visa is directly related to the volume of cards which are sold and the frequency they are reloaded. Each time a new card is sold, the store will make \$5.00 and each time a customer reloads an existing card at your location, your store will earn \$2.00.

How does the money get on the card?

It happens automatically. Using the SCCS system, when you specify the amount of funds to be loaded onto a card as directed by your customer, the system will electronically load the funds to a newly activated card or reload the customer's existing card instantly. Once every banking day (Monday-Friday except bank holidays) a Direct Debit ACH will be scheduled to transfer the appropriate funds from a bank account that you specify to pay for the card loads that your store has completed before 4:30pm Central Time. Funds loaded to cards after 4:30 PM Central Time will be processed on the next business day.

Sales and Technical Support

For sales and technical support, please contact Secure Check Cashing at 1-800-405-6527. For merchant support matters, please call MultiCorp at 1-866-459-9594. Also, look us up online at www.securecheckcashing.com.

Secure Check Cashing, Inc has been developing and marketing biometric check cashing solutions for over 14 years.
